

Hello
I'm Vinoth

aktech297@gmail.com

Discord : ak1#9966

Skills

- Knowledge in blockchain architecture and hands-on experience as Blockchain App developer.
- Smart contract writing using Solidity and Rust.
- Expertise in Languages : C++, Python, Solidity, Rust, JS, HTML, CSS, Web3
- SDK used : VS for C++, VS code, Remix, Hardhat, Truffle for Smart contract, React

Experience

Rimulation - *Blockchain Advisor and Smart contract writer*

- Went through the core architecture of Bitcoin and Ethereum and shared knowledge to build a separate blockchain.
- Wrote smart contracts using Hardhat with following ERC protocols such as ERC20 and ERC721.
- Worked on building dApp in Polygon chain and used React for front end development.

WWINR - *dApp developer*

- Used Truffle for smart contract writing.
- Explored the Solana chain and built MVP to participate in the Riptide hackathon. Used Rust for smart contract writing.

Amechain.io

- Explored cross chain collaboration and suggested the best possible approach.
- Assisted in writing wrapped tokens.

Projects

- Helped students from Turkey and explored ERC165, ERC1155 for their thesis in DeFi.
- Wrote smart contracts using Hardhat.

Others

- Explored Hedera, Avalanche, Solana chains to participate in hackathons.
- Building dApps.
- Learning to become a full stack developer.

Certifications

- Create real Smart Contracts in Solidity and DApps with React & Next JS. Understand how the Ethereum blockchain works - Udemy
- Ethereum & Solidity Programming For Beginners. Build 5 Hands-On Smart Contracts Token, ICO, Lottery, Auction, Crowdfunding - Udemy
- Smart contract programmer - Youtube

About me

- Software developer who is willing to learn new technologies and contribute to development.
